

PROTECT OUR ENVIRONMENT WE'VE GONE GREEN

R.E.A.C.C.T.™

RECYCLE • E-WASTE • AGAINST • CHILDHOOD • CANCER • TODAY

REACCT (Recycle E-Waste Against Childhood Cancer Today) will help recycle and provide technology to children with cancer. This program involves the collection of discarded computers, monitors, and cell phones that when improperly disposed of, damage our environment and are potential causes of cancer.

Newer laptops may be refurbished and provided to families in need while the remaining items will be properly scrapped for a negotiated scrap value, which will in turn be used to help fund other Foundation programs.

To donate discarded items or for further information, contact us:
